

## Why Ekinex

Because we believe in the technology that makes life easier. We build devices that make simpler gestures of everyday life. Our scenario is the world: homes, offices, public buildings, schools, hospitals, industries. Our concept of home automation is supported and made possible by the KNX standard, which allows the decentralized and automated management of technological systems of all types and sizes. We exploit the potential of the KNX system to ensure high quality standards for a project that we called EKINEX.

## 10 good reasons for choosing Ekinex

**1.**

Our products are designed and manufactured in Italy.

**2.**

We are not a multinational company. We are flexible and open to converse with our customers.

**3.**

We offer KNX-native products and solutions, the most widespread communication standard in the world. This guarantees the reliability and quality of our offers.

**4.**

We constantly update our production line, thus ensuring constant technological innovation of our items.

**5.**

We offer a complete range of products, which includes both wall-mount and switchboard devices.

**6.**

We care for design and offer reliable products with a high aesthetical value.

**7.**

We implemented a very advantageous distribution channel, relying on a short supply chain.

**8.**

We guarantee full support to the work of system integrators.

**9.**

We offer a prompt, careful service and fast delivery times worldwide.

**10.**

We guarantee high-level, cost-effective performance.

In order to achieve this aim, **Ekinex** undertakes the following steps:

- Implementation and improvement of a Quality System according to the requirements of UNI EN ISO 9001 and 2015
- Consolidation and implementation of the KNX product's range and evaluation of state-of-the-art technologies' advancement
- Development of business
- Consolidating business processes

In addition, the Company undertakes to ensure compliance with the regulations governing the sector and the applicable and binding laws.

Management commits itself to coordinating and controlling the Quality System to ensure that the expected results are achieved, promoting the improvement, the process approach and risk-based thinking.

This Policy is spread to all levels of the company in order to raise awareness throughout the staff, enabling everyone to effectively and efficiently carry out the tasks assigned, based on the improved plans and targets, to be achieved in accordance with those expressed in the Quality Policy.
